Open to full-time roles: remote (worldwide) or on-site / hybrid in Lagos · freelance & contract

SUMMARY

Full stack developer who ships web and mobile products end to end, from database design to the last UI state. Founder of Sova and Edify, first-place winner of OPEN//BUILD 2026 with Sowo, and second place at Devcenter Hacktober 2026 with Sova. Works across React, Next.js, Node.js, Python (FastAPI), Go, Flutter and PostgreSQL, and backs production work with automated tests and CI/CD.

SKILLS

Languages	TypeScript, JavaScript, Python, Go, Dart, SQL, HTML / CSS
Frontend & Mobile	React, Next.js, Tailwind CSS, Flutter, React Native (Expo), Framer Motion, Accessibility (WCAG)
Backend & APIs	Node.js, Express, FastAPI, REST APIs, WebSockets (Socket.io), JWT Auth, Payments (Razorpay, Paystack)
Data & Cloud	PostgreSQL (Neon, Supabase), MongoDB, Vercel, Cloudflare Workers, Render, GitHub Actions CI/CD, Git
AI Integration	LLM tool calling (Qwen3), Gemini API, Groq, Hugging Face, Claude Code agents, Rules-based AI guardrails

EXPERIENCE

Founder & Lead Engineer, Sova — **2026 – Present**

Savings-circle records for ajo, esusu and adashe groups · 2nd place, Devcenter Hacktober 2026 · Nigeria — sova.rumptycloud.app

- Built and launched a Flutter app (web, Android) and Node.js API that keeps a tamper-evident record of savings circles.
- Enforced rules in PostgreSQL 17 triggers and a SHA-256 hash chain; CI ships Android releases and ledger checkpoints.

Founder & Engineer, Edify — **2026 – Present**

Exam-prep platform for SS1–SS3 students · Nigeria — edify-sigma-plum.vercel.app

- Launched a paid study platform (plans from NGN 1,000) with 1,044+ practice questions, 44 lessons and timed CBT tests.
- Built on Next.js and Neon Postgres with a typed curriculum registry, so new lessons ship without route or API changes.

Frontend Developer Intern, Arrowstack · *Remote* — **2026**

- Delivered Kuza, a Next.js and TypeScript storefront with accessible keyboard navigation, persistent cart and checkout.
- Built Trackr, a logistics dashboard with Recharts analytics, sortable and filterable tables, and an alerts centre.

Full Stack Developer Intern, Oasis · *Remote* — **2026**

- Shipped Blaze, a MERN pizza-ordering platform with real-time order tracking over Socket.io and Razorpay payments.
- Implemented JWT auth with email verification, Cloudinary uploads, and an admin dashboard with low-stock email alerts.

PROJECTS

Sowo — AI Sales Assistant for WhatsApp Vendors (1st Place, OPEN//BUILD 2026) — Live · Code

Next.js 16 · TypeScript · FastAPI · PostgreSQL · Qwen3 · WhatsApp Cloud API · Paystack

- Frontend lead: built the web app and API contract. Qwen3 only picks tools; the server sets every price, so the floor never leaks.

CheckAm — Scam Checker for Nigerian Messages & Links — Live · Code

JavaScript · PWA · Tesseract.js · Serverless Functions · Groq

- Free app that flags scam messages, screenshots and links in English or Pidgin; an on-device rules engine keeps data private.
- AI can only raise a warning, never mark a message safe; 108 automated tests cover 44 real-world scam types.

FastTrack — Loan Onboarding & Pre-qualification — Live · Code

Flutter · Neon Postgres · Node.js / TypeScript · Gemini · GitHub Actions

- Five-minute flow returns a pre-qualified loan amount in ~3s; Gemini extracts the figures, a deterministic rules engine decides.
- Ed25519 JWT verification, presigned private storage, 97 automated tests, and CI/CD shipping web, Android and backend.

Astrolabe — Design-System Drift Checker (Open Source) — Live · Code

Go · Chrome DevTools Protocol · GitHub Actions · PostgreSQL

- Go CLI and GitHub Action that checks rendered colours, spacing and fonts against design tokens and fails PRs only on new drift.

ACHIEVEMENTS

1st Place — OSCA Ile-Ife OPEN//BUILD 2026 Hackathon — Won with Sowo as frontend lead — **2026**

2nd Place — Devcenter Hacktober 2026 — Won with Sova, competing as one of 30 selected developers — **2026**

Best Graduating Student — Nupat Technologies Fullstack Software Training Programme — **2024**

Builder, GDG OAU Build with AI — Google Developer Groups, Obafemi Awolowo University — **2026**

EDUCATION

B.Sc. Computer Engineering, Obafemi Awolowo University (OAU), Ile-Ife — **Expected 2030**

Fullstack Software Engineering Programme — Nupat Technologies — Graduated as Best Graduating Student — **2024**
